Rehabilitation Project to Restrict Traffic on Giles Road

An upcoming road rehabilitation project will require traffic restrictions on Giles Road. The work will include removal and replacement of bridge approach slabs, pavement repairs, dowel bar retrofit, and surface milling of pavement.

The work will take place on Giles Road between 108th Street and Southport Parkway and is scheduled to begin August 9. The project is expected to last approximately two months.

Throughout the project, traffic will be reduced to one lane each direction beginning with inside lanes and then moving to outside lanes.

Intersections throughout the project area will be kept open during daytime hours, but may be closed overnight.
